	Zostavax	Merck	0	0
<b>Yellow Fever</b>	YF-VAX	sanofi pasteur	0	0

1. A concentration of 1:10,000 is equivalent to a 0.01% concentration. Thimerosal is approximately 50% Hg by weight. A 1:10,000 concentration contains 25 mcg of Hg per 0.5 mL.  
 2. A previously marketed lyophilized preparation contained 0.005% thimerosal.  
 3. COMVAX is not approved for use under 6 weeks of age because of decreased response to the Hib component

\* This product should be considered equivalent to thimerosal-free products. This vaccine may contain trace amounts (<0.3 mcg) of mercury left after post-production thimerosal removal; these amounts have no biological effect. JAMA 1999;282(18) and JAMA 2000;283(16).
